

Native Plants and Cultivars for the Northern Piedmont

[This list is intended to promote greater availability and use of regionally native plants by including straight species and cultivars that provide food and shelter for our birds, pollinators and other wildlife.](#)

It is a work in progress, and we welcome suggestions to research. Among our major sources are:

[The Flora of Virginia](#)

[Mt Cuba Research Center](#)

Our regional area is the Northern Piedmont (NP) which includes 11 counties: Albemarle, Greene, Madison, Orange, Louisa, Nelson, Buckingham, Culpeper, Rappahannock, and Fauquier. Nurseries participating in our plant natives campaign have red “Virginia Natives” stickers on NP regional plants. A few stickered as Virginia Natives, **highlighted in orange** below, are outside our NP range, but are often found in the trade and native to elsewhere in Virginia.
